

Learn about weather!

Katie and the Magic Umbrella

Making science fun!

Your School Name

Presents

A Program with Author and Meteorologist Kristine Kahanek

Event Date

Event Time

Join Kristine for this fun-filled, educational, and interactive program where children will learn about all kinds of weather and severe weather safety.

Kristine will read from her 2 book series, **Katie and the Magic Umbrella**. She will also share with students a DVD animation of her first book, **A Stormy Adventure**, that brings the book to life with the sights and sounds of weather. The reading will follow with an interactive session designed to calm children's fears of storms, while teaching them all about different kinds of weather and how to stay safe. There will also be plenty of time for students to ask questions.

Following the program, Kristine will set aside time to autograph copies of her books for students and teachers. She also has many new educational toys and items available for purchase.
